PCT/IB 2002/002614

Ro	x No. I	B	Basis of the report				
<ol> <li>With regard to the language, this report is based on the international application in the language in which it was file otherwise indicated under this item.</li> </ol>							
		This rewhich	report is based on a translation from the original language into the following language  is the language of a translation furnished for the purposes of:	· · ·			
		international search (under Rules 12.3 and 23.1(b))					
			publication of the international application (under Rule 12.4)				
			international preliminary examination (under Rules 55.2 and/or 55.3)				
2.	jarnis	With regard to the elements of the international application, this report is based on (replacement sheets which have furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally fund are not annexed to this report):					
	닏		aternational application as originally filed/furnished				
	$\boxtimes$	the des	escription:				
			as original	ly filed/furnished			
		pages*	received by this Authority on				
	<u> </u>	pages*	received by this Authority on				
	$\boxtimes$	the cla	aims:				
		pages	as original	ly filed/furnished			
		pages*	as afficient (together with any statemen	t) under Article 19			
		pages*	* 10-12 received by this Authority on 12-07-200	4			
	$\boxtimes$		received by this Authority on				
			rawings:				
		pages pages*	as original	ly filed/furnished			
		pages*	received by this Additionly on				
			Tectived by this Authority on				
		a boque	nence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.				
3.		The arr	mendments have resulted in the cancellation of:				
			the description, pages				
		닐	the claims, Nos.				
			the drawings, sheets/figs				
			the sequence listing (specify):				
			any table(s) related to the sequence listing (specify):				
		This remade, s	s report has been established as if (some of) the amendments annexed to this report and listed below had not been le, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Park)				
			the description, pages				
			the claims, Nos.				
			the drawings, sheets/figs				
			the sequence listing (specify):				
			any table(s) related to the sequence listing (specify):				
*	If item	4 applie	es, some or all of those sheets may be marked "superseded."

Inventive step (IS)

Claims 1-27

Claims NO

1-27

Industrial applicability (IA) Claims 1-27 YES
Claims NO

2. Citations and explanations (Rule 70.7)

Novelty (N)

Documents cited in the International Search Report:

D1: US2002081560 A1

D2: US5991594 A
D3: WO9837555 A1
D4: EP1172739 A2
D5: WO0111588 A2

The documents cited in the International Search Report represent the prior art. The claimed invention stated in claims 1-27 is not considered to be anticipated by these documents. None of the documents or any relevant combination of them reveals a mass storage comprising multiple tracks of information where the tracks comprise different kinds of data as described in these claims.

According to the arguments stated above, the invention claimed in claims 1-27 is novel, considered to involve an inventive step and have industrial applicability.

Becker • Kurig • Straus

International Application No.

Applicant:

PCT/IB02/02614 Nokia Corporation

Date

July 12, 2004

## **New Claims**

- 1. Mass storage comprising multiple tracks of information, wherein said tracks have different kinds of data contents, wherein a reproduction of a subset of said tracks is provided for basic perception, characterized in that at least two of said tracks comprise synchronisation markers, to enable a seamless change between said tracks during reproduction.
- 2. Mass storage according to claim 1, wherein said synchronisation markers are to enable a time synchronisation of said different tracks during reproduction.
- 3. Mass storage according to claim 1 or 2, wherein said synchronisation markers are to enable a logical synchronisation of data within the tracks.
- 4. Mass storage according to claim 1, 2 or 3, wherein said synchronisation markers comprise an information about the storage location of other tracks.
- 5. Mass storage according to anyone of the preceding claims, characterized in that at least one of said tracks has a different length than the other one.
- 6. Mass storage according to anyone of the preceding claims, wherein at least one of said tracks comprises at least one hyperlink.
- 7. Mass storage according to anyone of the preceding claims, characterized by data to relate the reproduction of said tracks to predetermined rules.
- 8. Electronic reproduction device, comprising a multi-track reproducer, for reproducing stored multi-track reproduction data wherein said tracks have different kinds of data content, characterized by a component to adapt the reproduction of a subset of said tracks to predetermined conditions, said adaptation component being connected to said reproducer, and being adapted to operate a seamless change of the reproduction between two tracks having synchronisation markers.

AMENDED SHEET

10

Becker • Kurig • Straus

- 11
- 9. Electronic reproduction device according to claim 8, characterized in that said adaptation component is configured to automatically change the tracks during reproduction.
- 10. Electronic reproduction device according to claim 8 or 9, characterized in that said adaptation component is configured to automatically change the reproduction of said tracks during reproduction.
- 11. Electronic reproduction device according to anyone of claims 8 to 10, characterized by at least one sensor connected to said adaptation component for detecting environmental conditions
- 12. Electronic reproduction device according to anyone of claims 8 to 11, wherein one of said sensors is an illumination sensor.
- 13. Electronic reproduction device according to anyone of claims 8 to 12, wherein one of said sensors is an acceleration sensor.
- 14. Electronic reproduction device according to anyone of claims 8 to 13, wherein one of said sensors is an acoustical sensor.
- 15. Electronic reproduction device according to anyone of claims 8 to 14, wherein one of said sensors is a location sensor.
- 16. Electronic reproduction device according to anyone of claims 8 to 15, wherein one of said sensors is an optical sensor.
- 17. Electronic reproduction device according to anyone of claims 8 to 16, wherein one of said sensors is an electrical sensor.
- 18. Electronic reproduction device according to anyone of the claims, 8 to 17, characterized by an interface to connect to said reproducer.
- 19. Electronic reproduction device according to anyone of the claims 8 to 18, characterized by a built-in mass storage connected to said reproducer.
- 20. Electronic reproduction device according to anyone of the claims 8 to 19, characterized by a built in communication device.

Becker • Kurig • Straus

12

- 21. Electronic reproduction device according to claim 20, wherein said communication device comprises a mobile telephone.
- 22. Method for reproducing stored multi-track reproduction data in accordance with predetermined conditions, wherein said tracks comprise different kinds of data content, comprising: identifying said predetermined conditions, and automatically adapting the reproduction of a subset of said tracks to said predetermined conditions.
- 23. Method according to claim 22, further comprising relating said predetermined conditions to rules concerning the reproduction of said multi-track reproduction data.
- 24. Method according to claim 22 or 23, further comprising detecting environmental conditions, and wherein said adapting to predetermined conditions include the adapting to environmental conditions.
- 25. Software tool comprising program code means for carrying out the steps of anyone of claims 22 to 24 when said program is run on a network device or a mobile terminal device.
- 26. Computer program comprising program code means for carrying out the method of anyone of claims 22 to 24 when said program is run on a computer or network device.
- 27. Computer program product comprising program code means stored on a computer readable medium for carrying out the method of anyone of claims 22 to 24 when said program is run on a network device or a mobile terminal device.
